# DIPLOMA IN SOCIAL WORK

The **Diploma in Social Work (DSW)** programme is the first of its kind in Malaysia. It is a competency-based educational programme which has been designed with reference to the National Competency Standards for Social Work Practice (2010) where standards have been identified at a specific level for diploma students.

This programme was developed to meet the needs of two main categories of students:

- (i) working adults who are already involved as frontline workers in social welfare and human services but do not possess any recognised social work education or training qualification
- (ii) school leavers who are interested to pursue social work studies at diploma level

The programme and mode of study is approved by the Ministry of Higher Education (MOHE). It comprises a total of 90 credit hours which includes 8 credit hours of compulsory practicum attachment at social work related agencies.

With the DSW qualification, graduates will gain recognition as trained social workers and full membership with the Malaysian Association of Social Workers (MASW). The DSW programme will contribute towards an expansion of professionally-trained human resource in social work practice which is critically needed to manage the increasing number of people experiencing psychosocial problems, crises and pressures in daily living. It will also provide a pathway to an undergraduate degree in social work or related fields if the student wishes to pursue a higher level of qualification.

Formerly known as Certified Accounting Technician (CAT)

The ACCA's **Foundation in Accountancy (ACCA FIA)** qualification will provide you with a solid foundation in finance and accounting. You will learn all the necessary technical skills and knowledge required to perform an accounting-support role. Whether you wish to start a career in finance, gain recognition for the skills and experience you have, or want to move on to a more senior position in accountancy, the ACCA FIA qualification will help you towards your career goal.

The ACCA FIA qualification is internationally recognised and highly regarded. To achieve ACCA FIA status you will need to complete a set of examinations and one-year's practical experience in the workplace. The ACCA FIA qualification is flexible and allows you to study at your own pace and achieve a work-life balance that suits you. It usually takes one year to complete the seven ACCA FIA exams. And after passing the ACCA FIA exams, you will be able to gain exemptions from the ACCA Qualification and be one step closer to professional status.
